

In the Claims:

Please amend the claims as follows:

Claims 1-20 (Cancelled)

21. (New): A razor cartridge, comprising:
- a frame; at least four razor blades supported by the frame, wherein each razor blade includes a cutting edge that extends along a length of the razor blade;
 - a guard attached to the frame, the guard including a contact surface, and wherein the guard is disposed forward of the razor blades; and a cap attached to the frame, the cap including a contact surface wherein the cap is disposed aft of the razor blades;
 - wherein the at least four razor blades are arranged so that the cutting edge of each razor blade is adjacent a plane extending between the contact surfaces of the guard and the cap.
22. (New): The razor cartridge of claim 1, wherein the at least four razor blades are positioned relative to the plane such that the cutting edge of each razor blade is contiguous with the plane.
23. (New): The razor cartridge of claim 21, wherein interblade spacing among the at least four razor blades is uniform.
24. (New): The razor cartridge of claim 21, wherein interblade spacing among the at least four razor blades is non-uniform.
25. (New): A razor assembly, comprising:
- a handle;
 - and a head that includes a frame, at least four razor blades supported by the frame, wherein each razor blade includes a cutting edge that extends along a length of the razor blade, a guard attached to the frame, the guard including a contact surface, and wherein the guard is disposed forward of the razor blades, and a cap attached to the frame, the cap including a contact surface wherein the cap is disposed aft of the razor blades;

wherein the at least four razor blades are arranged so that the cutting edge of each razor blade is adjacent a plane extending between the contact surfaces of the guard and the cap.

26. (New): The razor assembly of claim 25, wherein the at least four razor blades are positioned relative to the plane such that the cutting edge of each razor blade is contiguous with the plane.
27. (New): The razor assembly of claim 25, wherein interblade spacing among the at least four razor blades is uniform.
28. (New): The razor assembly of claim 25, wherein interblade spacing among the at least four razor blades is non-uniform.
